Reserve your place today!

Let's come together to celebrate music, art, and unity under one roof.
See you there!

ricardo kondo is a Mexico City-born, Ibiza-based DJ, producer, and composer whose emotionally rich sets blend melodic house, techno, and cinematic storytelling. A Berklee graduate and one half of Mariaxibit, his music has resonated across the globe on stages like The Gardens of Babylon, Zamna, and AfrikaBurn—where in 2025, a double rainbow appeared mid-set, marking one of the most magical moments of his career. Lately, he's been exploring ambient soundscapes and sonic journeys, expanding his craft into more introspective and immersive realms. His mantra: "I may not blow your mind, but I will definitely touch your heart."

I AM YOU

I have been playing music since a very early age. I remember a Farfisa organ in my bedroom when I was five and me finding the notes of Beethoven's 5th. I remember the bass standing in front of the bass amp in my father's rehearsal room and how it shook my guts and I liked it. I remember laying in the back of the back seats on top of the speakers in my father's car, travelling across Europe, blasting Abbey Road over and over. Music is what has brought me here and a constant presence in my life. Everything is music. Even utter silence. During the course of my life I have spent most of my time listening to music, playing music, producing music, studying music, writing music, thinking about music, being music. I am here to share my greatest passion with the rest of the world. With love, M.
